

Nosirov Nurmuhammad, Frontend Developer

Uzbekistan, Tashkent, +998950524626, nosirov032.uz

Experience

Frontend Developer, 4DX

Jan 2024 - Feb 2024

- Contributed to the enhancement of internal systems for clinics and businesses, focusing on design changes and optimization for improved performance. Primary technologies: React.js, Material-UI.
- Implemented pixel-perfect designs based on Figma prototypes for specific pages, ensuring consistency and alignment with the overall system.
- Customized system components to allow for flexible layouts and color schemes, enhancing user customization options and usability.
- Implemented React performance optimizations, improving the system's responsiveness and overall user experience.

Frontend Developer, [Jobo uz](#)

Mar 2023 - Dec 2023

- Played a key role in the development of Jobo uz, a pioneering startup aimed at revolutionizing the recruitment process, facilitating seamless interactions between candidates and companies. Primary technologies: Nuxt.js, Tailwind CSS.
- Designed and implemented a user-friendly dashboard for companies, enabling efficient candidate management and streamlining the hiring process.
- Developed a comprehensive quiz website to evaluate candidate knowledge, providing companies with valuable insights into candidate suitability.
- Developed a separate super admin dashboard, empowering Jobo uz administrators to efficiently manage both types of users (companies, candidates) and quiz functionalities.

Internship: Frontend Developer, [UC-Coding](#)

Oct 2022 - Dec 2022

- Contributed to various projects for an outsourced software company, focusing on frontend development tasks.
- Designed and developed the primary company website showcasing services, prices, and projects using React.js and Tailwind CSS, ensuring a modern and user-friendly interface.
- Collaborated on an existing project for buying and selling real estate, implementing frontend enhancements using Sass and React.js to improve user experience and functionality.
